Changing Currency in PowerStore

By default, PowerStore is configured to sell products in USD ($). However, with a few modifications to the code you can use PowerStore to sell a variety of different products.

What Do You Need to Start?

- Dreamweaver

- PowerStore

- Dreamweaver site defined to your PowerStore files

Find and Replace 'USD'

The first step is to search your entire PowerStore site for the term 'USD' and replace this with the appropriate acronym for your currency.

1. With your PowerStore site selected in Dreamweaver, press **Ctrl (Cmd) + F**.

2. From the Find in menu, choose **Entire Current Local Site**.

3. From the Search menu, choose **Source Code**.

4. In the Find Field enter **USD**.

1. In the Replace field, enter the acronym for your preferred currency.
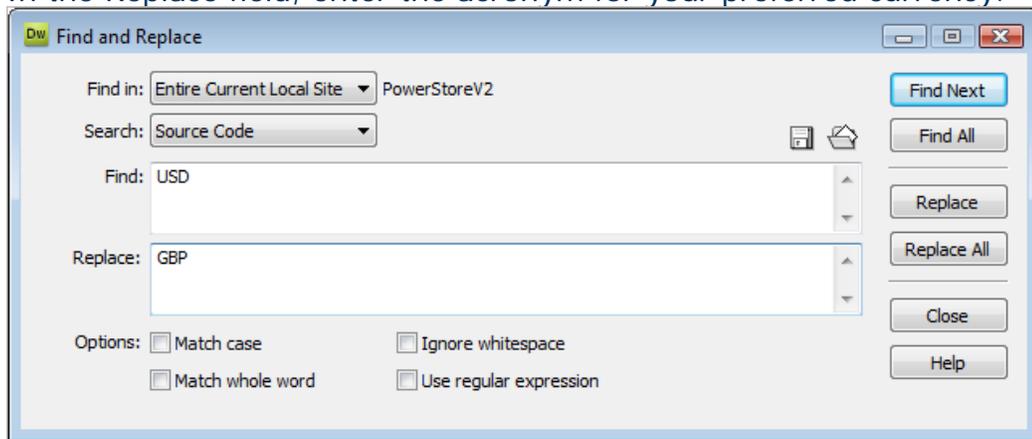

In the case of this screenshot, USD will be replaced with GBP for the British Pound (£).

6. Choose **Find All**.

7. Once the search is complete, review the search results to double-check that any custom content you have added is not included.

8. Choose **Replace All**.

Dreamweaver will then search your entire site and replace USD with your currency's acronym.

Change the $ symbol

Next, you need to go through the code on each of the pages to change the currency symbol that display on the page.

Note: Since the dollar sign ($) is used commonly throughout PHP code, we cannot do a Find and Replace as we did for the currency acronym.

1. Open **Products_Results.php**.

2. If not already, choose **Design** to enter Design view.

3. Change all $ entries to your desired currency symbol.

4. Press **Ctrl (Cmd) + S** to save the page.

5. Close the page.

6. Repeat this process with the pages listed below.

- Products_Results.php

- Products_Detail.php

  Note: When changing the currency symbol for this page, make sure to change the reference in the JavaScript code at line 388. This code will look like:
  ```
  var thePriceField = "$"+
  getFromRSDump(theRet,"ProductPrice");
  ```

- cart.php

- confirm.php

- Admin/Products_Results.php

- Admin/Products_Update.php

- Admin/Products_Detail.php

Update the WA_Store_Cart_PHP.php file

The next step is to update an eCart settings file to use the correct currency symbol.

1. In your PowerStore files, expand the **WA_eCart** directory.

2. Open the **WA_Store_Cart_PHP.php** file.

3. Select Code view.

4. Scroll down to line **366**.

5. Replace the dollar symbol ($) with the desired currency symbol.

6. Press **Ctrl (Cmd) + S** to save this page.

Once you have made this change to all your pages, your PowerStore site should now be ready to work with your preferred currency.
